

EVOMINI IOCM

Signal converter for RTD Pt100 and Pt1000 temperature sensors with IO-Link interface, metallic body

Can be configured in three operating modes: IO-Link, 4+20mA loop powered and switching output with alarm thresholds (SIO). Stainless steel body with dual M12 connector and IP67 protection degree. External influences such as ambient temperature, vibrations, moisture and EMC interference have minimal influence on the measurement thanks to the compact and robust design. Compatible with Italcoppie TRM and TRC sensors series.
